

FILMING YOUR SEGMENT

Use your iPad to film the following scenes:

1. Your introduction
2. Your establishing shots
3. Your interview questions
4. Some action shots of your subject
5. Your wrap-up

Some important things to remember:

- Film your shots in "landscape" - ie with your iPad sideways.
- Make sure there isn't too much background noise when you are filming.
- Make sure your subject is well lit, and there aren't any distracting shadows on their face.
- Start filming 5 seconds before the action starts, and keep filming for 5 seconds after the action finishes. Hold still and smile!
- Make sure you speak clearly, with lots of energy and enthusiasm.

**HAPPY
FILMING!**
